

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

MUSTER ROLLS

OF THE

Pennsylvania Navy.

---

1776-1779.

---

---

## PREFATORY NOTE.

---

When Volume One of the Second Series of Pennsylvania Archives was printed, it was supposed that it included all the records of the Pennsylvania Navy. Recently some muster rolls have been found which, although in part duplicating what was contained in the volume referred to, comprise such valuable additional material, relating to that branch of the Continental Service in which Pennsylvania took such a prominent part, that it has been deemed advisable to print all the rolls.

LIST OF SOLDIERS

WHO SERVED AS

Rangers on the Frontiers.

---

1778-1783.

---

---

## **PREFATORY NOTE.**

---

The list of Revolutionary Soldiers which follows is copied from a volume recently discovered of payments made to the individuals noted for services chiefly on the Frontiers as Rangers, between the years 1778 and 1783. As the majority of the names appear more than once upon the list, this is owing to the fact that they were paid for different tours of duty. It is to be regretted that the Company designation is not attached to each individual, for had that been the case the men might have been arranged into companies. No year is given for the specified service.
